

## Introduction to BTL Super RF

Super RF is imported from the United Kingdom imported equipment, technically using a combination of ultrasound and radio technology, is the world's latest technology. Its treatment effect in Europe and the United States received the praise, is used in the Chinese market for young and non-invasive face fat the latest technology. Facial and body can be treated, cost-effective, the effect is very good. Controllable cooling technology allows energy to penetrate very deep, for more advanced tissue and relatively fat fat for treatment. It is currently on the market only a truly non-invasive professional plastic ultrasonic ultrasound equipment!

# BTL's three major effects

## **BTL technical principles**

Unipolar RF + ultrasound technology: uniform heating for the treatment area, so that subcutaneous fat quickly reach the treatment temperature, to achieve the dual role of firming and dissolving fat.

Peltier layered cooling system: treatment can choose to heat the different layers of fat layer, from subcutaneous fat to the skin, stratified treatment, improve local relaxation.

Convenient clever body treatment head: 360 ° for the body of the whole body fat treatment, any place where fat accumulation can quickly and easily down.

## **Common Problem:**

**1, BTL super radio frequency treatment safe?**

A: BTL RF access to the US FDA, the European CE and other international quality certification, and after several scientific clinical validation, to ensure the safety of technology.

**2, BTL super radio frequency treatment pain?**

A: The biggest feature of BTL radiofrequency treatment is painless comfort. Without anesthesia, the feeling of treatment like hot stone massage, but the effect is remarkable.

**3, BTL super radio frequency therapy effective?**

A: After years of clinical practice and many scientific validation: EXILIS treatment can get rid of wrinkles, enhance facial contours, skin firmness, body shaping and other treatment. Treatment can promote the increase in the density of collagen and elastic fibers, so that the skin becomes more young and compact, delay skin aging. Body shaping treatment can cause fat cell apoptosis, as long as you maintain a good living habits, body sculpting effect will be lasting.

## Do you still have these pains?

The arms are not thin enough  
Waist a little fat  
Clothes are hard to buy  
Buttocks are not enough big  
Haven't Boyfriend  
Thighs a little thick

When you have this  
machine ,  
all these can change !

In order to test the effect of BTL Exilis RF machine, experts specifically use a fat pork to do the test Let's see the result of using the BTL RF technology.

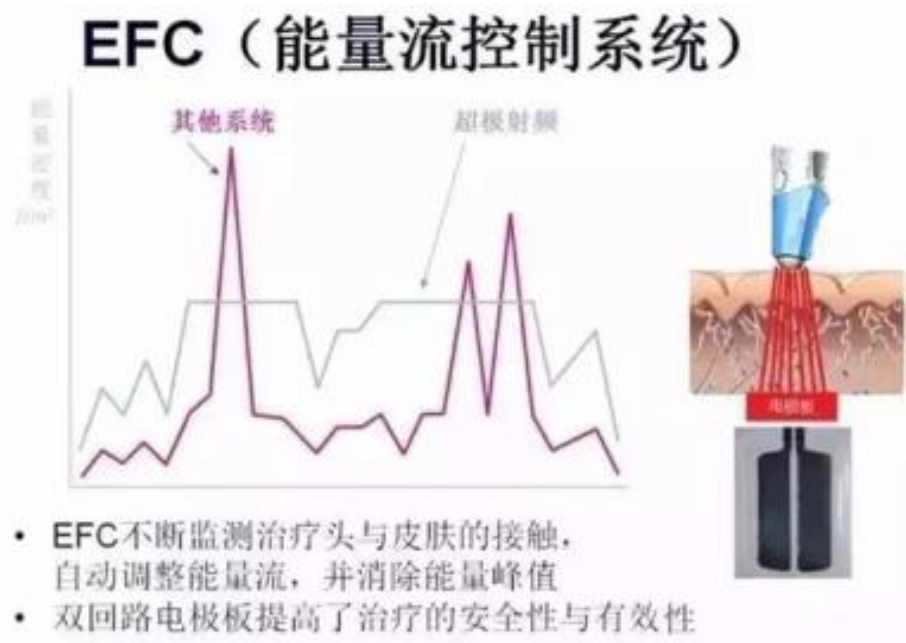

**Note: the red circle is BTL super radio frequency after a cosmetic effect with the surrounding no beauty treatment of fat contrast, red circle fat has obvious changes, it is clear that the fat has been broken down, fat effect See, see BTL super RF slim technology amazing effect.**

Note: the red circle is BTL super radio frequency after a cosmetic effect with the surrounding no beauty treatment of fat contrast, red circle fat fat has obvious changes, it is clear that the fat has been broken down, fat effect See, see BTL super RF slim technology amazing effect.

## EFC energy control system

EFC constantly monitors the head of the treatment head with the skin, automatically adjusts the flow of ability and eliminates the ability to peak. The double circuit plate improves the safety and efficacy of the treatment.

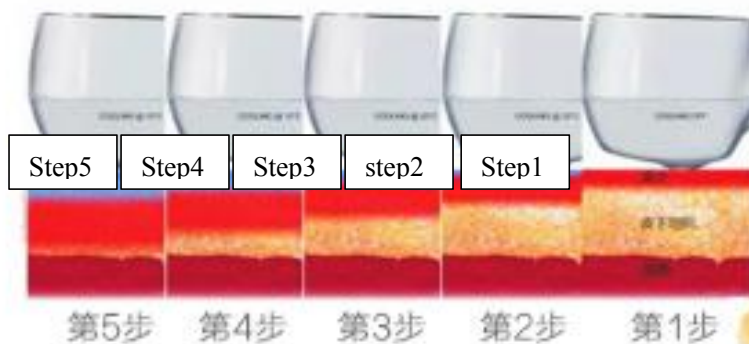

## BTL face young to achieve results

- 1, collagen and elastic fiber regeneration
- 2, facial promotion, clear outline
- 3, to reduce wrinkles and fine lines
- 4, remove the neck wrinkles
- 5, remove the double chin
- 6, body shaping

BTL Super RF Instruments  
Shaping perfect combination with weight loss

The radio frequency energy can accurate arrival to the body of different physical treatment depth, the energy evenly distributed make the fat dead,so as to achieve the effect of fat removal and body sculpting.

Seven advantages easily enjoy "thin" life

1, accurate. According to the individual fat thickness set treatment depth, multi-file adjustment, facial, body dual treatment head, 360 ° omni-directional treatment, treatment more accurate.

2, fast. High-energy treatment head can quickly reach the treatment temperature,

Make treatment faster and more effective.

3, safe. Constantly testing the treatment of head and skin contact, automatically eliminate the energy peak, greatly improving the safety of treatment.

4, non-invasive, through the radio frequency and ultrasonic direct fat layer, skip the surface of the skin layer will not have any trauma.

5, painless, comfortable and painless treatment, the most comfortable weight loss fat.

6, lunch break down, fast and effective, that is to do that go, no recovery period.

7, synchronized skin. Through the role of radioactivity to the skin, making the skin compact, synchronized skin effect.

## BTL super RF operating advantage

### 1. A wide range of treatment options

For the body and facial treatment and specially designed two treatment head, easy to operate, a wide range of applications.

### 2. Promise adjustment cooling system

Can be in accordance with the thickness of each person's fat layer, through the cooling level set treatment depth, to provide customers with the most accurate treatment.

### 3. higher energy, faster

High-energy treatment head can quickly reach the treatment temperature, so that treatment faster and more effective. The built-in thermometer continuously measures the temperature of the treatment area.

### 4. patented EFC energy flow control system

Constantly testing the treatment head and skin contact, automatically eliminate the energy peak, improve the safety of treatment.

## Treatment range

Forehead: wrinkles removal, skin tightening

cheek: face skin lifting, to eliminate wrinkle

Neck and brast: Firming the skin and removing wrinkles

Eyes: remove wrinkles, improve bags under the eyes

Under cheek&chin : facial lift, eliminate double chin

Hand: Firming the skin and removing wrinkles

## BTL EXILIS解决问题

- 1、皮肤松弛 2、皱纹横生
- 3、眼袋明显 4、盘子脸、大饼脸
- 5、双下巴 6、颈纹
- 7、蝴蝶袖 8、大胖腿

## BTL EXILIS Solve the problems

- 1.Skin relaxation
- 2.Wrinkles
3. bags under the eyes
- 4.Big face
5. double chin
- 6.The wrinkle of neck

## **BTL super radiofrequency treatment effect**

- 1, adipocyte apoptosis; collagen regeneration;
- 2, excess fat reduction; elastin regeneration;
- 3, cellulite reduction; skin density increased;
- 4, deep tissue compact; wrinkles / fine lines to reduce;
- 5, skin firmness; facial promotion;
- 6, heating mode, so that fat cell apoptosis, and with the lymphatic system excluded in vitro, to achieve permanent weight loss effect;

### **BTL super radiofrequency**

- ◆ **Non-invasive fat firming integration**
  - ◆ **Facial+body treatment**
  - ◆ **Unipolar RF+Ultrasound**
  - ◆ **Temperature -controlled layered fat - dissolving technology**
  - ◆ **EFC**
  - ◆ **No anesthesia, no uncomfortable**
  - ◆ **No recovery period, no expensive consumption of materials**

- 无恢复期、无昂贵耗材

## **parameter**

Power: 200W

Input voltage: 220V 50HZ

Energy: 0-120 file adjustable

Screen: 8 inch touch screen

Operating system: EFC (energy flow control system)

## **Accessories**

Size handle 1 each

Size handle with a set of screws

Host 1 set

Power cord 1

Negative piece 1 sheet

Negative line 1
